

COM 211, Spring 2008
Project 2 (Due 5/15/08)

Project 2 involves the production of a short form (under 6 minutes) video. The genre of the video could be but not limited to theatrical, documentary, and artistic expression. Students (as individual) will select a genre and submit a **Project Outline. Project Outline is due on Tuesday, 3/25/08.** The goal of Project 2 is to allow students to have hands on approach to the production process; such as planning, directing, camera works and editing. Project 2 also has a component of students exploring their personal creative process of video production. Competent editing skill with the Non-linear editor is expected as an outcome of this project.

Students are expected to maintain meticulous records all through the production process. A successful Project 2 will include completion of the project prior to due date. Project Outline, Production Notes and Editing Decision List (EDL) must be submitted with the project. Failure to submit any or all forms will result to grade deduction. Students will receive a grade F if the project is not completed before due date. In case of equipment failure, students will be compensated for the time they have scheduled prior to the equipment failure; no other time compensation will be given.

The checklist below contains the technical requirement for the project:

- Complete project outline, production notes, and editing decision list.
- Sign up for using equipment and the NLE.
- A presentation about your video. Imagine you are a producer selling your video to the Creative Director of the network/syndication. Describe to him/her the nature of your project. Explain your goals of doing your project. Discuss the techniques you used in the video as you are showing to him/her. The presentation is due the same day you turn in your tape.
